KEYSKILLS

- UX Architecture
- Product Design
- Design Systems
- User Research
- Information Architecture
- Wireframing & Prototyping
- Interaction Design
- Accessibility (WCAG)
- Usability Testing
- Analytics-driven UX
- AI-Assisted Design & Mockups
- Stakeholder Collaboration

TOOLS&TECHNOLOGY

Figma
Components, Variables, Auto Layout, Prototyping, Design Systems

Figma Make
AI-assisted UI generation, rapid mockups, interactive prototypes

Claude
AI ideation, requirements analysis, UX flows, mockups and design documentation

Adobe XD
UI design and prototyping

Sketch
UI design and interaction design

CERTIFICATIONS

Google UX Design Certificate
Google

Design Thinking and Innovation
IIT Bombay

Human Computer Interaction
Interaction Design Foundation

User Research Methods
Interaction Design Foundation

PROFESSIONAL SUMMARY

9+ YEARS OF EXPERIENCE

Associate UX Architect with **9+ years** of experience designing intuitive, accessible, and data-driven digital experiences across **enterprise, B2B and B2C** products in healthcare, insurance, education and other complex business domains.

I combine conventional UX practices with **AI-assisted design workflows (Claude, Figma Make)** to accelerate ideation, create high-fidelity mockups, build interactive prototypes and deliver scalable, accessible and business-focused solutions. Experienced in **user research, information architecture, wireframing, prototyping, design systems, usability testing** and analytics-driven UX optimization that improve engagement, conversion and customer satisfaction.

MY UX APPROACH

Research
- User interviews & surveys
- Stakeholder workshops
- Analytics & behavioural review
- Claude-assisted synthesis of raw research data

Interaction Design
- Wireframes & user flows
- Hand-built Figma prototypes
- Figma Make for rapid UI generation
- Interaction patterns explored with Claude

Analytics
- Heuristic evaluation
- Manual funnel & drop-off review
- AI-surfaced behaviour patterns
- Automated insight summaries

Validate & Iterate
- Usability testing sessions
- Stakeholder feedback loops
- AI-generated design variants for faster iteration
- Continuous improvement from data

CORE EXPERTISE

- UX Architecture & Strategy
- Information Architecture
- Design Systems & Tokens
- User Research & Insights
- Wireframing & Prototyping
- Interaction Design
- Accessibility (WCAG)
- Usability Testing & Validation
- Analytics-driven UX Optimization
- AI-Assisted Design (Claude, Figma Make)
- Stakeholder Collaboration
- UX Strategy & Mentoring

PROFESSIONAL EXPERIENCE

Evoke Technologies Pvt Ltd
Associate UX Architect

Mar 2020 — Present
Hyderabad

Enterprise Products | B2B | Web & Mobile | AI-enabled Products

- Define and execute end-to-end UX strategy aligned with business goals, user needs and product vision.
- Design enterprise web applications, dashboards and complex workflows for insurance, healthcare, manufacturing and other domains.
- Conduct user research, stakeholder interviews and usability testing to identify pain points and validate solutions.
- Use AI tools (Claude, Figma Make) to generate mockups, explore design directions and accelerate design exploration.
- Create information architecture, user journeys, wireframes, high-fidelity designs and interactive prototypes.
- Build and evolve scalable design systems using Figma components, variables and tokens.
- Ensure accessibility (WCAG) and inclusive design across products.
- Collaborate with Product, Engineering, QA, Business and Marketing teams to drive successful implementation.
- Mentor and guide UX/UI designers and establish design processes and best practices.
- Explore emerging technologies including AI-powered experiences and conversational UX.

Yark5 Entertainment LLP
UX Designer

Aug 2018 — Feb 2020
Hyderabad

B2B | B2C | Education | Healthcare | Insurance

- Designed user experiences for web and mobile products across multiple domains.
- Translated business requirements into user flows, wireframes, prototypes and visual designs.
- Conducted user and stakeholder research and validated concepts through usability testing.
- Created reusable design patterns and workflows to maintain consistency across products.
- Collaborated with product managers, developers and stakeholders throughout the product lifecycle.
- Used AI tools to quickly explore design concepts and create interactive prototypes for stakeholder discussions.

Huetint Software Pvt Ltd
Junior UX Designer

Jul 2016 — Aug 2018
Hyderabad

Web Applications | Digital Products

- Designed user workflows and interfaces for web-based digital products.
- Created wireframes, user flows, prototypes and visual designs based on business requirements.
- Worked with senior designers and developers to translate concepts into implementable experiences.
- Participated in usability validation and design iterations.
- Built a strong foundation in interaction design, information architecture, visual design and user-centered design.
